

Every minute of every day someone has a heart attack and yet more than half can be prevented by a *simple and easy test*.

Know Your Coronary Artery Calcium Score!

BECAUSE EVERY HEART MATTERS

3 years ago Victoria founded No More Broken Hearts to raise awareness about the importance of Coronary Artery Calcium Scoring (CACs) to prevent heart attacks, especially in asymptomatic individuals. Numerous articles about this unique nonprofit organization have been published and Victoria is a frequent guest speaker for several local and national organizations, and has been featured on local bay area radio programs as well.

My life took an unexpected tragic turn 3 years ago when my husband died suddenly of a heart attack at the age of 46. He led a very active lifestyle and certainly did not fit the profile of someone who was at risk for a heart attack but he had heart disease that went completely undetected. To cope with his death, I immersed myself in learning all I could about heart disease, early detection and who really is at risk.

"Ms. Dupuy is not only passionate about teaching others the lessons she learned so tragically, but she is educated, poised, eloquent and effective. She is very knowledgeable on the topic of early heart disease detection and can present to medical and public crowds with confidence and accuracy. She has the support of many prominent physicians and experts in the field of cardiac imaging and detection."
